

1-B6782-032

Retractable Cable Collector

General

The 1-B6782-032 is specifically designed to be fixed to a floating roof for collecting retractable cables. It rises and falls with movement of the roof, uncoiling the cable as the roof lowers, and collecting the cable again as the roof rises.

The 1-B6782-032 is supplied with drainage holes.

Details

- Simplifies electrical connections of floating roof tanks
- Collects and releases coiled cable in moving installations
